SAFEWAY UA

SAFE WAY UA - professional transportation and logistical support service is on the final stage of establishing. We are dedicated to safe, reliable travel across Ukraine and to/from the European Union. While we prepare for our official company launch, we are already fully operational and ready to assist you or your organization immediately.

Since the start of Russia's full-scale invasion, we have been actively working in frontline and high-risk areas of Ukraine. Our team has successfully supported international medical missions, foreign private companies across multiple sectors, journalists, NGOs, and governmental delegations.

We have provided secure transportation, on-site coordination, and professional interpretation services for medical professionals, business representatives, and institutional partners — including cooperation with both Ukrainian authorities and foreign governmental bodies.
We recognize the critical nature of your missions and are structured to deliver dependable support under any conditions — including in close proximity to active conflict zones.

OUR SERVICES INCLUDE:

- Door-to-door transfers between EU countries and Ukraine (in either direction)
- Comprehensive trip support throughout Ukraine
- Modern, comfortable passenger van (capacity 4–7 persons)
- English-speaking professional driver with Tactical Combat Casualty Care (TCCC) certification
- Assistance with accommodation and local logistics
- Qualified interpreter for meetings and negotiations (upon request)
- Secure travel to frontline and high-risk locations → Full protective equipment provided (body armor, helmets, individual first-aid kits) → Additional combat medic in the crew when required
- 24/7 operational coordination and real-time adaptability to changing security conditions

Whether you represent a company on a business visit, an international or volunteer organization, a media team, or an individual traveler with specific needs in Ukraine, we are prepared to ensure your safety, comfort, and mission success — regardless of the operational environment.

Should you or any of your contacts require reliable ground transportation and on-the-ground support in Ukraine, we would be grateful for the opportunity to assist or for your recommendation.
